Learning Environment Preparation

Follow these steps to set up your Kubernetes learning environment with all required tools.

1. Install Podman

- Podman Desktop Downloads
- Podman Installation Guide

2. Install Kind (Kubernetes IN Docker/Podman)

- Kind Quick Start Guide
- Note: Kind can run with Docker or Podman as the container runtime.

3. Install kubectl (Kubernetes CLI)

- kubectl Installation Instructions

4. Install Helm (Kubernetes Package Manager)

- Helm Installation Guide

5. Install freelens (Kubernetes IDE)

- freelens GitHub Repository

Prerequisites

- Install kind
- Ingress documentation for kind
- Install Metrics Server on kind
- Example Gist: Metrics Server on kind
